

Panouri Fonoabsorbante - WEB

Perdele Acustice

WEB - acoustic curtains serve several purposes: they effectively absorb sound, divide space visually and constitute a unique decorative element. They are a great solution for those interiors where the installation of other acoustic materials is limited. Thanks to their openwork form and lightweight, they subtly divide space, and their colour and shape build the right ambience of the interior. The curtain can be mobile thanks to a specially selected rail.

WEB - installation.

WEB - assembly is very simple. The curtain is hung on a special rail mounted to the ceiling, the panels are linked with plastic straps secured with snap rivets. Depending on the accessories used, the curtain can be mobile or fixed in place. The connecting strips between individual panels are made of very durable plastic, resistant to tearing or cracking. A set of the necessary accessories is included with the product.
